INCIDENT OBJECTIVES	1. INCIDENT NAME Potato Cave Fire	2. DATE PREPARED 07/31/12	3. TIME PREPARED 2100
4. OPERATIONAL PERIOD (DATE/TIME) 08/04-05/12 0700-2200			
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) 1. Provide for firefighter and public safety utilizing the "10 Standard Fire Orders" and "18 Watchout Situations" and incorporating Lookouts, Communications, Escape Routes, Safety Zones. 2. Keep the fire south of private land along County Road 734, East of County Road 365, West of the North Fork River, and North of County Road 368. 3. Limit impacts to private land where possible, by using tactics that reduce threat to structures, pastures, and timber values. 4. Keep fire out of Devils Backbone Wilderness. 5. Minimize impacts to the North Fork River corridor, Special Use permit holders, and private businesses. 6. Maintain communications and strengthen relationships with the Dora Volunteer Fire Department and the Ozark County Sheriff's Department.			
6. WEATHER FORECAST FOR OPERATIONAL PERIOD See separate morning Fire Weather Forecast handout.			
7. GENERAL SAFETY MESSAGE Firefighter safety comes first on every fire, every time. The 10 Standard Firefighting Orders are firm. Every firefighter has the right to know that his or her assignment is safe- questions are always welcomed and expected. In an Initial Attack situation you may be tempted to drive Code 3 without the benefit of red lights and siren! Don't do it! The lives of you and your crew and the public on the roads are more important than any acre or structure out there. Arriving alive is more important than arriving 5 minutes quicker.

MEDICAL EMERGENCY PROCEDURES

In the event of a medical emergency, the Incident Commander will be notified immediately to ensure timely medical treatment of the injured person(s). The goal of medical emergency procedures is to get the patient to qualified medical treatment within 1 hour of the occurrence of the injury/medical condition. The Incident Commander will initially identify and prioritize transport options. The IC will designate an on-scene Point of Contact (POC) to coordinate with Rolla Dispatch and use any of the resources assigned to the burn to facilitate the emergency evacuation. The Point of Contact will take charge of the scene, follow the Incident Communication Protocol, coordinate the request for transportation, and ensure patient assessment information is transmitted directly to Rolla Dispatch. The prescribed burn may be delayed or shut down as necessary to facilitate this effort.

Provide information to the communications unit using this Incident Communications Protocol

1. Declare the nature of the emergency.
 - a. Medical injury/illness? If injury/illness is it Life Threatening?
2. If Life Threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene Point of Contact (POC) by Resource and Last name (i.e. POC is TFLD Smith).
4. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS)
5. Identify on-scene medical personnel by position and name(i.e. EMT Jones).
6. Identify preferred method of patient transport.
7. Request any additional resources and/or equipment needed.
8. Document all information received and transmitted on the radio or phone.
9. Identify any changes in the on-scene Point of Contact or medical personnel as they occur.

Incorporate incident personnel to assist with leading emergency personnel and equipment into the scene.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Potato Cave	DATE: 08/04-05/2012	TIME: 0800
Major Hazards and Risks: Blow Down Extremely Dry Fuels Power Lines Snags Steep topography Traffic Extreme Heat		
<u>Fire Order of the Day</u> – Obtain current information on the fire status		
<u>Narrative:</u> You may be involved in initial attack over the next few days. Take the time NOW to review the 10 and 18. All of those orders and watchout situations can quickly come in to play in an IA situation. Just because yesterday was quiet does not mean today will be that way. Don't become complacent. Keep your situational awareness high. Heat will continue to be an issue. Pace yourself. Remember, your number one objective is for you and your crew to go home safely. If you see something, say something.		
<h3 style="text-align: center;">Watch Out Situation of the Day</h3>  <p style="text-align: center;">11. UNBURNED FUEL BETWEEN YOU AND THE FIRE</p>	<h3 style="text-align: center;">Heat Illness</h3> <p>⇒ In these conditions being 'a little hot' can quickly escalate from heat cramps to heat exhaustion then heat stroke.</p> <p>⇒ Be aware of how you are feeling and help your crew mates by observing them too. One of the symptoms of heat illnesses is mental confusion. The person experiencing it may not realize how sick they are and what the danger is.</p> <p>⇒ Symptoms include, but are not limited to – cramps, fatigue, nausea, weakness, confusion or anxiety, dizziness.</p> <p>⇒ Drenching sweats accompanied by cold, clammy skin are symptoms of heat exhaustion. If the victim passes that stage and has hot, flushed, dry skin – they may be facing heat stroke.</p> <p>⇒ Heat stroke can occur suddenly, without any symptoms of heat exhaustion. If a person is experiencing symptoms of heat exhaustion or heat stroke, GET MEDICAL CARE IMMEDIATELY. Any delay could be fatal. Seek emergency medical care for anyone who has been in the heat and who has the following symptoms:</p> <ul style="list-style-type: none">• Confusion, anxiety, or loss of consciousness• Very rapid or dramatically slowed heartbeat• Rapid rise in body temperature that reaches 104 to 106 degrees Fahrenheit• Either drenching sweats accompanied by cold, clammy skin (which may indicate heat exhaustion); or a marked decrease in sweating accompanied by hot, flushed, dry skin (which may indicate heat stroke)• Convulsions• Any other heat-related symptom that is not alleviated by moving to a shady or air-conditioned area and administering fluids and salts	

Incident Safety Officer: Tim Stanton
